

Enhanced 6 ft. New York Style Roof Hook Design

- Hook and chisel end drop-forged from high-carbon steel ensuring durability.
- Featuring 1-inch diameter Drawn Over Mandrel (DOM) steel tubing providing strength while minimizing weight.
- Slot forged into the lower hook to allow for the secure attachment of a traditional Halligan tool.
- Pointed end of the upper hook is designed to break tempered glass, such as window and auto glass, or to pierce roof decking, enhancing safety and providing foot support during roof work.
- The chisel end, along with the 1-inch diameter tubing, is compatible with standard fire ladder rungs, offering additional safety and support during roof operations, as well as a means to securely hang gear and equipment off the side of the ladder.

Proudly Made in the USA! SKU: RHNY-6
